「AGAINST ANIMAL TESTING」

with **BEAGLE FREEDOM PROJECT** 🐾

OVER 65,000 DOGS ARE BEING USED IN ANIMAL TESTING RIGHT NOW IN THE U.S.

Beagle Freedom Project is working hard to end all forms of animal testing around the world and we need your help!

Beagle Freedom Project is a non-profit animal rescue and advocacy organization and the world's leading organization for rescuing and rehoming animals used in experimental research. BFP is dedicated to the rescue and rehabilitation of animals used in testing and research and subjected to other forms of unique cruelty, abuse and neglect.

BFP strives to end this cruelty through its rescues, educational programs, campaign initiatives and lobbying efforts to make the world a better, safer and healthier place for both animals and people alike.

Beagles are the breed of choice for testing because of their friendly, docile and trusting nature.

BFP has passed life-saving laws giving these animals a second chance at life after archaic experimentation.
